What is a Sol-Ark 15K hybrid inverter?

The Sol-Ark 15K All-In-One Hybrid Inverter combines battery charging, MPPT (Maximum Power Point Technology), grid pass through, and sell back capabilities. It's a powerful inverter. It can power an entire home with 12-15kW continuous power from batteries and solar, or it can provide up to 48kW continuous power from the grid.

How many inverters can a Sol-Ark 15K inverter run?

The Sol-Ark 15k all-in-one hybrid inverter takes up to 19.5kW from solar and outputs up to 15kW to power loads. It includes three MPPTs with two strings each and rapid shutdown capabilities. It can back up an entire home during a power outage, and it's possible to wire up to 12 inverters in parallel for commercial or industrial applications.

How many lithium batteries can a hybrid inverter stack?

Stack up to 9 Lithium Batteries per system! Just give our office a call and ask about adding more power storage. Delivering 10,000W of rated power output, this rugged pure sine wave hybrid inverter is capable of pairing with either GEL or LI batteries. Dual MPPTs provide 99% efficiency. Provides 120V and 220V output power.

How much power does a 15K Solar System use?

Available power from the 15K depends on the system. A system with only batteries outputs up to 12kW continuously while a grid-tied system uses up to 48kW from the grid. When used with solar panels, the 15K can receive up to 19.5kW of solar input, using up to 15kW to power loads and 4.5kW to simultaneously charge batteries.

Access power to your entire 200 amp main panel and choose where to use your home's power. Power all the energy consuming items in the AI+ 12K.15 package plus the AC, water heater, ...

The Solar Array will produce around 69300 Watts per day based on 4.5 hours sun. This size of system generally works great for Mid sized homes, ...

Power your home, business, or commercial facility with the Liniotech 15kPV Hybrid Inverter, engineered to deliver maximum energy efficiency, smart battery storage integration, and high ...

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

Bring true energy independence to your project with the industry's most powerful 48 V hybrid inverter paired with a rugged 16.1 kWh LiFePO4 (Lithium Iron Phosphate) battery.
