-----

In the cities of Zurich and Basel and the villages of Hergiswil, Willisau and Dagmersellen, a "landing party" of project participants with equipment in backpacks "landed". ...

However, public protests around the globe against the construction of 5G network base stations have continued to occur for fear that electromagnetic (EM) waves emitted from the stations ...

Despite extensive studies into the health effects of mobile phones and base stations over the last two or three decades, there is no indication of an increased health risk when exposed to ...

Over 90% of 5G BS have achieved co- construction and sharing, and 5G networks are accelerating their development towards intensive, efficient, green, and low-carbon [1].

To understand the current situation of the electromagnetic radiation environment of 5G application base stations is the basis for avoiding the old road of "pollution before ...

However, the available studies have not investigated the health effects resulting from exposure from the 5G mobile phone and base station antennas from 700 MHz to 30 GHz ...

In this paper, we investigate the main categories of misinformation regarding 5G, i.e., fake theories, the misconception of 5G features, and open questions that require further ...

The goal of this paper is to present the main elements of this technique in order to overcome the existing extremely dangerous shortcoming in practical methods and means of ...

Despite extensive studies into the health effects of mobile phones and base stations over the last two or three decades, there is no indication of an ...

This white paper provides information related to human exposure to radio frequency electromagnetic fields (RF EMF) from the base stations in the new 5G networks and describes ...

Performance of three different methodologies and equipment (broadband probes, spectrum analyzers, and drive test scanners), in the context of human exposure to ...
