According to the International Energy Agency (IEA), Africa holds about 60% of the world's best solar resources. While Europe and ...

Morocco and South Africa are building large-scale solar power installations, while Kenya and the Democratic Republic of the Congo are making use of local renewable energy ...

Made up of 54 countries, Africa gets more sunshine hours than any other continent. It has some of the highest levels of solar ...

Our research explores the role off-grid solar could play in different scenarios in Africa. It covered 43 countries for which data is available, and that are home to more than 99% ...

Discover how Africa is transforming its energy landscape by harnessing solar power. Despite challenges, the continent's growing commitment to solar energy is paving the ...

When it comes to reaching the Mission 300 target, and universal energy access more broadly, investments in distributed renewable energy solutions are key to ensuring that ...

Discover how off-grid solar and wind solutions are expanding energy access in Africa. Learn how CLG Energy Transition Centre ...

When it comes to reaching the Mission 300 target, and universal energy access more broadly, investments in distributed ...

By 2024, an estimated 43 million people in sub-Saharan Africa have basic electricity access via off-grid solar

(IEA 2024). This shift delivers not just light, but also improved ...

According to the International Energy Agency (IEA), Africa holds about 60% of the world's best solar resources. While Europe and Asia lead in solar deployment through the ...

Made up of 54 countries, Africa gets more sunshine hours than any other continent. It has some of the highest levels of solar irradiance -- the power of the sun per ...

With 600 million Africans without electricity, massive investments in off-grid solar are emerging as a key solution. Cheaper and quicker to deploy than national grids, this model is attracting ...
