---

With the flick of a switch, Austria has become home to its largest battery installation, marking a significant milestone in the nation's energy storage capabilities.

Discover how GSL Energy successfully deployed a 20kWh stackable LiFePO4 battery system with a 10kW Deye hybrid inverter in Salzburg, Austria. This residential solar ...

For the first time, an analysis shows how much storage capacity Austria needs on its path to 100% renewable electricity by 2030 ...

Austria currently has around 1.1 GW of battery storage, but needs to reach roughly 5.1 GW by 2030 -- a more than five-fold increase -- and 8.7 GW by 2040. Storage isn't just ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

Austria's latest subsidy round for solar and storage has sparked overwhelming interest, highlighting how quickly demand for clean ...

For the first time, an analysis shows how much storage capacity Austria needs on its path to 100% renewable electricity by 2030 and climate neutrality by 2040. Battery storage ...

Slovenia-based NGEN put Austria's largest battery energy storage system into operation. It installed it in record time - just seven months.

Austria currently has around 1.1 GW of battery storage, but needs to reach roughly 5.1 GW by 2030 -- a more than five-fold increase ...

Austria, like other countries deploying significantly more renewable energy, is working to scale up its use of battery energy storage systems (BESS), which are proving essential for the...

Austria's latest subsidy round for solar and storage has sparked overwhelming interest, highlighting how quickly demand for clean energy technologies is accelerating across ...

We are proud to announce the successful installation of a containerized lithium battery energy storage system in Austria, shipped directly from our manufacturing base.
