Method #1: AC Coupling Method #2: DC Coupling Replace Your Grid-Tie Inverter with A Storage-Ready Inverter Wrapping Up Grid-tied inverters need the power grid to operate--they constantly sense grid voltage and frequency and will shut off if it falls out of range. In an AC coupled system, the grid-tied inverter is paired to an off-grid inverter and battery bank. The off-grid inverter provides a second power source, which effectively tricks the grid-tied inverter into...
