What is a Benning tebevert III inverter?

The Benning TEBEVERT III Inverter system is perfect for information, telecommunication, and industrial applications that demand continuous power protection and availability. The Benning TEBEVERT III Inverter system is perfect for information, telecommunication, and industrial applications that demand continuous power protection and availability.

What are the advantages of a tebevert III inverter system?

The use of semiconductors with high switching frequencies allows for compact construction, low weight, and high efficiencies. The TEBEVERT III Inverter system can be scaled up in 5kVA increments, up to a maximum power output of 25kVA.

How many kVA can a tebevert III inverter run?

The TEBEVERT III Inverter system can be scaled up in 5kVA increments, up to a maximum power output of 25kVA. Modules operating in parallel allows customers to run the inverter in an N+1 configuration for added redundancy.

Contact a supplier or the parent company directly to get a quote or to find out a price or your closest point of sale.
