The main objective was to increase the use of solar energy in industry, develop new collector technologies, and demonstrate industrial and municipal water treatment as a new application ...

Brunei has announced the development of a 30 MW solar power plant in Kampung Sungai Akar, a major project set to boost the ...

This article provides an overview of harnessing solar energy for wastewater treatment plants, highlighting its relevance and importance ...

By using solar panels to power the aeration equipment, these plants can optimize their oxygen supply while cutting back on their energy bills. But the innovation doesn't stop there.

This article provides an overview of harnessing solar energy for wastewater treatment plants, highlighting its relevance and importance in the context of renewable energy.

The project, which originated from a request for proposal (RFP) process launched in 2021, will be developed on a remediated ...

Brunei has announced the development of a 30 MW solar power plant in Kampung Sungai Akar, a major project set to boost the nation's renewable energy capacity.

This article investigates the performance behaviour of a small decentralized wastewater treatment plant with a capacity of up to 50 ...

Because solar adoption at wastewater treatment plants is still relatively new, there is little known about these
