If you're wondering which country uses photovoltaic energy storage to combat both energy shortages and climate change, let's talk about Egypt's surprising solar leap.

Egypt's abundant solar irradiance, strong wind corridors, and significant potential for cost-effective green hydrogen production give the ...

Egypt's first large-scale hybrid solar and battery plant has begun construction as the country looks to its abundant sunshine to help fix its energy crisis.

Oslo/Cairo, 05 May 2025: Scatec ASA has commenced construction of its 1.1 GW Obelisk solar and 100 MW/200 MWh battery storage project in Egypt.

Egypt's first large-scale hybrid solar and battery plant has begun construction as the country looks to its abundant sunshine to help ...

It has estimated that this will require 31 GW of solar, up from just 1.77 GW at present, making for an incredibly ambitious target. A goal of 60% renewables by 2040 has also ...

Scatec has signed a mandate letter with several development financing institutions for concessional financing and expects to reach financial close with the lenders and start ...

Egypt's abundant solar irradiance, strong wind corridors, and significant potential for cost-effective green hydrogen production give the country a competitive edge.

The Egyptian cabinet announced the financial closure for the 1 GW solar facility, enabling construction to begin immediately. The solar ...

CAIRO, July 1 (Reuters) - Egypt wants to accelerate the provision of renewable energy that could ease electricity shortages and supply green power to Europe, but faces challenges in funding...

Norway's renewable energy producer Scatec will begin work on Egypt's first hybrid solar power and battery storage project in the first half of 2025.

Covering highways with solar panel roofs could offer significant benefits in terms of safety and carbon emission reductions, a new analysis suggests.
