Why is Cambodia getting a tariff on solar panels?

Solar panels on the outskirts of Phnom Penh, March 13, 2024. (CamboJA/Pring Samrang) Cambodia has been hit with a steep tariff of more than 3,500% on its solar cell exports to the U.S. - the highest among Southeast Asian countries - after producers and the government failed to cooperate with a year-long U.S. trade probe now nearing its end.

How will Cambodia's new solar rates affect trade?

The new rates are expected to severely impact trade, especially as Cambodia's solar exports to the U.S. were already on the decline. In 2024, solar panel exports dropped sharply to \$830 million - a nearly 60% fall from \$2.07 billion in 2023. Exports to the U.S. alone plunged by more than 61%.

What is Cambodia's solar subsidy rate?

Brightbill spoke during a Monday press call. The 3,403.96% subsidy rate set for four Cambodian solar exporters is "among the highest rates I've ever seen in any kind of countervailing duty investigation," Brightbill said. The across-the-board dumping rate for Cambodia is 125.37%.

Does China impose tariffs on solar panels?

The Commerce Department in 2023 found that manufacturers had operated in Malaysia, Thailand, Cambodia and Vietnam to dodge tariffs on Chinese-made solar components, and it imposed import duties accordingly. Chinese solar module manufacturer JinkoSolar is subject to an 38.38% subsidy rate in Malaysia, and an 125.91% dumping rate in Vietnam.

imported from Cambodia of ...

The US Department of Commerce on April 21, 2025, issued a final decision imposing tariffs on solar panels imported from Cambodia of up to 3,400 percent, the highest ever.

By comparison, tariffs on Malaysia, Thailand, and Vietnam were lower. The result was immediate: Cambodian solar exports fell to just \$4.4 million in the first half of this year, ...

Cambodia's near-total export collapse stands out, raising questions about whether such punitive measures were necessary or if they've backfired by destabilizing a key supplier.

The tariffs will be ratified at the International Trade Commission's meeting in June, following investigations into unfair practices in the US domestic solar market. The tariffs were ...
