The Mexican government announced in March 2025 a first-of-its-kind measure in the region: all solar and wind power plants must integrate battery systems equivalent to 30% of their installed ...

Future wind and solar energy projects in Mexico will be required to colocate battery energy storage systems equivalent to 30% of their capacity, a senior government ...

According to the regulations promulgated in March 2025, all new solar and wind power projects must be equipped with battery systems equivalent to 30% of their installed ...

Mexico's new 30% battery storage mandate is set to transform the renewable energy sector. Learn how this policy impacts grid stability, private investment, and the future of ...

This reflects a significant commitment to strengthening Mexico's energy infrastructure, aimed at improving the stability and efficiency of the national electricity system, ...

Renewable energy developers in Mexico will need to provide battery storage equivalent to 30% of a plant's capacity, senior energy ...

Renewable energy developers in Mexico will need to provide battery storage equivalent to 30% of a plant's capacity, senior energy ministry official Jorge Islas said.

This report provides a high-level summary of the role that battery storage technologies can play in Mexico's transition toward higher penetrations of variable renewable energy generation.

Energy storage, particularly smart, scalable, and sustainable solutions like LFP batteries, offers Mexico the
