-----

The large-scale 250 megawatts (MW) battery will store enough renewable energy to power one-third of the city of Canberra for ...

The government said the big battery project will be capable of responding rapidly to network constraints and will be able to store enough renewable energy to power one-third of ...

The large-scale 250 megawatts (MW) battery will store enough renewable energy to power one-third of the city of Canberra for two hours during peak demand, helping to ...

The large-scale battery energy storage system is on track to be operational in 2026. The ACT Government will receive a 50% share of the net revenue generated from the ...

Currently storage of electrical energy in Australia consists of a small number of pumped hydroelectric facilities and grid-scale batteries, and a diversity of battery storage ...

Over the next year, three new community-scale battery energy storage systems (BESS) will be deployed across Canberra to optimize solar energy usage, stabilize grid ...

The ACT Government is future-proofing Canberra's energy supply by expanding its renewable energy storage with a new partnership with global specialist energy storage business, Eku ...

Eku Energy has finalized financing for its 250 MW/500 MWh energy storage system in Canberra, contributing to the energy security of the ACT and its ambitious climate goals.

Australia's capital is stepping into the renewable energy spotlight with its ambitious Canberra energy storage
