-----

Chinese officials recently unveiled plans for what they claim will be the world's largest solar farm, spanning an immense 610 square kilometres (235 square miles) - roughly ...

The world's largest 1 GW offshore solar farm located off the coast of Dongying, Shandong Province, China is now connected to the grid.

China has brought a 1 GW offshore solar power plant online off the coast of Dongying, Shandong province, combining PV with energy storage and aquaculture in what is ...

China races to build world's largest solar farm to meet emissions targets Tibetan sheep graze at a solar farm in Hainan prefecture of western China's Qinghai province on ...

China has more utility-scale solar than any other country. The 277 GW of utility-scale solar capacity installed in China in 2024 alone is more than twice as much as the 121 ...

Solar farms are already proving to be an effective addition to traditional power, but now it looks like they may have additional environmental benefits.

China's first gigawatt-level offshore photovoltaic (PV) project, the world's largest open-sea solar installation, has been fully connected to the grid.

China has connected the world's first 1-GW offshore solar farm to the grid, a plant off Shandong set to generate 1.78 TWh per year.

China is building an enormous network of clean energy industries on the Tibetan Plateau, the world's highest.
