Why is the Netherlands giving up control of Chinese chipmaker Nexperia?

The Netherlands is giving up control of Chinese-owned chipmaker Nexperia, the acting Dutch Economic Minister Vincent Karremans said on Wednesday. It comes amid a dispute between the Netherlands and China sparked by the Dutch government's takeover of the company in September. European carmakers rely heavily on Nexperia components.

Why did the Netherlands take over Nexperia?

It comes amid a dispute between the Netherlands and China sparked by the Dutch government's takeover of the company in September. European carmakers rely heavily on Nexperia components. The Dutch minister indicated the Netherlands was responding to positive signals from China.

Does China want the Netherlands to act unilaterally?

“China once again urges the Netherlands not to act unilaterally, but to immediately correct its mistakes and clear the obstacles to restoring the stability and security of the global semiconductor supply chain,” the Chinese commerce ministry said in a statement. The Dutch government was not immediately available for comment early on Wednesday.

Why did Washington take control of Nexperia in the Netherlands?

Late last month, Washington's intensifying contest with Beijing for control over tech supply chains spilled over in the Netherlands. The Dutch government, under pressure from U.S. officials, took control of the Chinese-owned chip maker Nexperia.

Nexperia has shown the world how unprepared Western supply chains are for decoupling from China - and how quickly the Chinese ecosystem can adapt.
