OverviewHistorySolar resourcesSolar photovoltaicsConcentrated solar powerSolar water heatingEffects on the global solar power industryGovernment incentivesChina is the largest market in the world for both photovoltaics (PV) and solar thermal energy. Its PV capacity crossed 1,000 gigawatt (one terawatt, 1 TW) in May 2025. By June 2025, China's PV capacity surpassed 1,100 gigawatt. In 2024, China added 277 gigawatts (GW) of solar power, which was equivalent to 15% of the world's total cumulative installed solar capacity.

Discover how China's ambitious space-based solar power project could redefine clean energy by beaming uninterrupted solar energy from orbit--and explore what it means for ...

Expected to collect energy at a constant rate more than 10-times more efficient than photovoltaic panels on Earth, China is planning to build a solar array 1km-wide.

China has unveiled the world's first dual-tower solar thermal power station in the Gobi Desert, using 27,000 mirrors to generate ...

To build kilometer-wide solar stations in orbit, harness the sun's energy 24/7, and wirelessly transmit power to the planet. If ...

On the Tibetan Plateau, nearly 10,000 feet high, solar panels stretch to the horizon and cover an area seven times the size of ...

Smart zero carbon container terminal at Section C of Tianjin Port's Beijiang Port Area. This is the world's first smart zero carbon container terminal, which incorporates a ...

Solar power in China China's solar potential Wind and solar surpassed a quarter of China's electricity

generation for the first time in April 2025.

Discover how China's ambitious space-based solar power project could redefine clean energy by beaming uninterrupted solar ...

Companies like Space Solar are devoted to transforming the bold vision of space-based solar power into a tangible, revolutionary energy source. In just over a decade, it plans ...

China plans to build a massive 0.6-mile-wide solar power station in geostationary orbit, 22,370 miles above Earth, capable of ...

China has launched a solar energy system that floats on seawater - the first of its kind suitable for industrial use and large-scale power production - as part of broader efforts to ...
