China Three Gorges Renewables, a Chinese state-owned power company, is planning to develop a massive 18 GW energy project in Ordos, Inner Mongolia.

On Sep. 29, construction officially began on the large-scale new energy base in the central and northern areas of the Kubuqi Desert, Inner ...

It will be tendered through a transparent, competitive process to attract private sector investment and support Mongolia's renewable energy and climate goals. This initiative ...

Once completed and put into operation, the project will significantly improve the stability of Wuhai's power grid and increase the capacity for consuming green electricity.

On June 26, the construction of the world's largest power generation-side energy storage project in Ulan Chab, Inner Mongolia, officially began.

It is expected that the project will improve the stability of two isolated grid systems by using battery storage for peak shifting, frequency regulation, and grid balancing, enabling ...

In 2024, the UNDP piloted a project that provided 69 ger district households with solar photovoltaic systems equipped with battery storage and electric thermal heaters, ...

On Sep. 29, construction officially began on the large-scale new energy base in the central and northern areas of the Kubuqi Desert, Inner Mongolia, China, which is scheduled to ...

In a significant move to bolster renewable energy infrastructure, the Asian Development Bank (ADB) has approved a grant to help Mongolia develop a 5 MW solar power ...

The Asian Development Bank (ADB) and the Mongolian government have inaugurated a 5-MW solar PV farm hybridised with a 3.6-MWh battery energy storage system (BEES) in Zavkhan ...

The 3-million-kilowatt photovoltaic power station project in the Ordos coal mining subsidence area of Inner Mongolia is part of China's second batch of large-scale wind power ...

On June 26, the construction of the world's largest power generation-side energy storage project in Ulan Chab, Inner Mongolia, ...
