What are energy storage systems used for?

Energy storage systems are suitable for noise-sensitive environments, such as events and construction sites, as well as for telecom, manufacturing, mining, oil and gas and rental applications. They are ideal for applications with a high energy demand and variable load profiles, as they successfully cover both low loads and peaks.

What is the next generation of E-Stor battery energy storage?

The next generation of our E-STOR battery energy storage range will include systems from 10MW up to 100MW+. Our new range of products, in the final stages of development, are designed for larger, commercial battery energy storage and industrial battery energy storage applications. Suitable for both in-front and behind-the-meter applications.

What is battery energy storage used for?

Battery energy storage for commercial use and utility scale implementation. Our battery energy storage products help businesses manage and use their energy, integrating with energy assets on site and supporting energy optimisation. What is battery storage used for?

Are battery energy storage systems transforming the power supply sector?

Battery energy storage systems are transforming the power supply sector by becoming the heart of energy efficient solutions. They are used in off-grid applications or to boost the limited grid available by efficiently storing and delivering energy to match the load demand.
