What is a Dr&#228;ger containerized live fire training system (clfts)?

Dr&#228;ger Containerized Live Fire Training System (CLFTS) The Dr&#228;ger Containerized Live Fire Training System can be equipped with a variety of interior fire simulators. The propane-based CLFTS is modular,expandable,utilizing single or multiple containers,and requires only limited site preparation. It can even be moved and re-installed.

What is a containerized live fire training system?

The Containerized Live Fire Training System offers a multitude of training scenarios,each with a different learning focus. Basic behavioral patterns can be taught as well as the tactics of deployment and extinguishing techniques. The training in the fire container also teaches the firefighters how to handle heat in the presence of fires.

What can be taught in a fire container?

Basic behavioral patterns can be taught as well as the tactics of deployment and extinguishing techniques. The training in the fire container also teaches the firefighters how to handle heat in the presence of fires. The accessible roof of the container can also be used as an extension to the training scenarios.

Search for used container fire generator. Find Easy Kleen, Kohler, Caterpillar, Bunzl Distribution, and MAC for sale on Machinio.
