How much does a 20 kW solar system cost?

A 20 kW solar panel system is enough to power a large home--but it'll cost you about \$55,000. Why trust EnergySage? Installing a solar panel system can save you tens of thousands of dollars over time, but the upfront costs aren't exactly chump change.

How much does a solar panel system cost?

Installing a solar panel system can save you tens of thousands of dollars over time, but the upfront costs aren't exactly chump change. In 2024, the average cost for a 20 kilowatt (kW) solar panel system hovers around \$55,000 before incentives, though actual prices vary depending on your location and installation specifics.

How much electricity does a 20 kW solar system produce?

A 20 kW solar panel system produces about 29,033 kWh of electricity annually, but the exact amount depends on where you live and how much sun you get. DIYing a 20 kW solar panel system usually isn't your best bet: You're much better off hiring a professional solar company for optimal results. How much does a 20 kW solar system cost?

Where can I get a net meter for my solar system?

The Solar Energy Industries Association (SEIA) states that 34 states and Washington, D.C. and Puerto Rico participate in net metering programs, so we recommend asking your solar installer to see if it's available where you live. Find a network of trusted installers for your solar system, solar panels and electricity needs.
