What is the HS code for energy storage?

SPECIFIC CUSTOMS CODE FOR ENERGY STORAGE The HS code that typically pertains to energy storage systems, particularly lithium-ion or lead-acid batteries, is 8507.60. This designation covers various types of batteries utilized in energy storage applications, playing a vital role in commercial and residential energy systems.

What happens if a lithium-ion battery is imported into the United States?

After the subject lithium-ion battery is imported into the United States, it will be incorporated into a residential energy storage solution, which requires a battery management system, additional battery units, enclosures, and other components.

Is a lithium-ion battery pouch cell classified under HTSUS?

You suggest the subject lithium-ion battery pouch cell is classified under subheading 8507.60.0010, Harmonized Tariff Schedule of the United States ("HTSUS"). Although we agree the subject battery pouch cell is classified in heading 8507, HTSUS, we disagree on the subheading.

Are lithium-ion battery cells properly classified?

It is now CBP's position that Lithium-Ion Battery Cells are properly classified, in heading 8507, HTSUS, specifically in sub-heading 8507.60.00, HTSUS, which provides for "Electric storage batteries, including separators therefor, whether or not rectangular (including square); parts thereof: Lithium-ion batteries."

One of the biggest distinctions lies in whether you are exporting individual battery cells or finished energy storage systems (ESS).

To navigate the complexities of customs codes for energy storage devices, it serves companies well to develop a comprehensive ...

For energy storage products like lithium-ion batteries, they typically fall under HS code 8507. However, the

precise mapping may ...

Pursuant to 19 U.S.C. § 1625(c)(1), this notice advises interested parties that CBP is proposing to revoke five ruling letters pertaining to the tariff classification of Lithium-Ion Battery Cells.

For energy storage products like lithium-ion batteries, they typically fall under HS code 8507. However, the precise mapping may vary based on specific characteristics, ...

It focuses on the key requirements for exporting SOC (State of Charge) battery energy storage cabinets, including UN38.3 testing, classification and packaging, and ...

To navigate the complexities of customs codes for energy storage devices, it serves companies well to develop a comprehensive understanding of both the overall ...

The products at issue are rechargeable, pouch-type battery cells used in a variety of applications, including storing surplus energy ...

The container under consideration is not designed to transport goods, but rather to store batteries in a designated location. As a result, classification of the container in heading 8609 is precluded.

The products at issue are rechargeable, pouch-type battery cells used in a variety of applications, including storing surplus energy generated from wind and solar power sources, residential ...

Well, when it comes to shipping energy storage systems globally, that detail is HS code classification. Last month alone, U.S. Customs held up \$37 million worth of lithium-ion battery ...

The item under consideration is referred to as a Battery Energy Storage System. The system will be imported under four model numbers: SBE 125, SBE 250, SBE 500, and ...
