-----

We demonstrate that this model achieves good estimation performance, and it is able to capture the benefits of energy saving when dealing with the complexity of multi-carrier base stations ...

Kyocera is leveraging its proprietary, globally developed ...

Have you ever wondered why communication base stations consume 60% more energy than commercial buildings? As 5G deployments accelerate globally, the DC energy storage ...

Texas Instruments (TI) has developed a solution that combines adaptive digital pre-distortion (DPD) with crest factor reduction (CFR) to address these issues.

Kyocera is leveraging its proprietary, globally developed telecommunications and virtualization technologies to bring base station functionality to general-purpose servers using ...

As offshore wireless communication networks expand, the role of base stations in ensuring connectivity becomes increasingly critical. However, the isolated and

Based on a digital twins (DTs) IoT environment, we depict how to optimize the energy efficiency of large-scale multiple-input multiple-output (MIMO) systems under WET ...

In today's 5G era, the energy efficiency (EE) of cellular base stations is crucial for sustainable communication. Recognizing this, Mobile Network Operators are actively prioritizing EE for ...

The present-day tele-space is incomplete without the base stations as these constitute an important part of the modern-day scheme of wireless communications. They are ...

Discover how base station energy storage empowers reliable telecom connectivity, reduces OPEX, and supports hybrid energy.

To enhance system efficiency and establish green wireless communication systems, this paper investigates base station sleeping and power allocation strategy based on ...
