"Healthy pipeline of projects in development" in Europe, but energy storage is still "significantly underutilised," a new EU report finds.

Discover the evolving policies and regulations of the European Union and United Kingdom, with both issuing landmark legislation in the ...

Many European energy storage markets are growing strongly, with 4.9 GW (12.1 GWh) of utility-scale (front-of-the-meter) energy storage deployed in 2024, giving an estimated total of more ...

The main energy storage method in the EU is by far "pumped storage hydropower", which works by pumping water into reservoirs when there is an electricity surplus in the grid - ...

The EU has taken steps to develop a strategic framework for energy storage, in view of accelerating the transformation of the EU's energy system and bringing promising new low ...

In 2020, the European Commission published a study on energy storage, which summarized some previous studies and reports, explored current and potential energy storage ...

Many European energy storage markets are growing strongly, with 4.9 GW (12.1 GWh) of utility-scale (front-of-the-meter) energy storage deployed in ...

Discover the evolving policies and regulations of the European Union and United Kingdom, with both issuing landmark legislation in the energy storage.

By definition, a Battery Energy Storage Systems (BESS) is a type of energy storage solution, a collection of
