New materials developed here are solving the region's biggest energy puzzle: how to store solar and wind power effectively when the sun isn't shining and the wind isn't blowing.

The Dominican Republic took its first step to encourage the ...

Grupo Puntacana, a sustainable tourism company, and Eurelius, a developer and investor in energy transition projects, will collaborate to implement a large-scale solar energy generation ...

The national energy commission (CNE) of the Dominican Republic this week granted a definitive concession for a 83.4-MW/101.6-MWp solar project with storage, while the ...

The decreasing cost of solar technology and energy storage systems is making solar energy more competitive with traditional fossil fuels in the Dominican Republic.

The Dominican Republic took its first step to encourage the installation of non-conventional renewable energy projects by creating an attractive regulatory framework for ...

The project aims to provide technical assistance to the MEM to enhance the integration of energy storage systems into renewable energy applications in rural electrifications, particularly solar ...

A hybrid solar power system allows homeowners to generate electricity, store excess power, and export surplus energy to the grid under Net Metering agreements. Here's an optimized system ...

Zenith Energy Corp SRL, a subsidiary of Blacktree Capital Management, has initiated construction of the 101.2-MWp Dominicana Azul solar farm in the Dominican Republic, ...
