While double glass modules offer numerous benefits, it's essential to consider factors such as weight and installation requirements. Advancements in manufacturing have led ...

While designing the double-glass module, it was also decided to increase the distance between the edge of the cell and the edge of the module, allowing for an increase of the maximum ...

In recent years, with the rapid development of the photovoltaic industry, double glass module as a high reliability and high weather resistance product is favored by many PV ...

The tracking bracket of photovoltaic modules is a bracket system that can dynamically adjust the Angle of the module according to the position of the sun, compared with the fixed bracket, it ...

Glass-glass PV modules, also known as double glass solar panels, are photovoltaic modules encapsulated with tempered glass on both the front and back sides. Compared to ...

Double-glass modules, with their performance in the face of salt mist, high temperatures and high humidity, have won the market's favour. ...

In systems with double-glass panels, the voltage can reach 1500 V (in traditional modules up to 1000 V). When choosing a greater working voltage for the solar panels, helps to ...

Our industry-leading module power contributes to a conversion efficiency ...

Combining gettering process and \sim c-Si technology to ensure higher cell efficiency and higher module power. Up to 99.99% Bifaciality. Natural symmetrical bifacial structure bringing more ...

These double-glass modules assembled with bifacial PERCIUM cells have capability of converting lights incident on their rear side into electricity on top of is being generated by the front side, ...

Double-glass modules, with their performance in the face of salt mist, high temperatures and high humidity, have won the market's favour. However, this trend is not ...

Our industry-leading module power contributes to a conversion efficiency of 23.2%. Bifacial ratio reaches 80%,30% more module power generation than conventional modules. Two-sided ...
