---

The following year, anti-dumping duties of up to 70% and countervailing duties of around 15% were imposed on Chinese glass. In 2019, the first "sunset review" extended the ...

More than 97% of solar panels installed in the EU are imported and most come from China, she asserted. Nevertheless, the European ...

While photovoltaics (PV) play an increasingly central role in Europe's clean energy transition and energy independence, a hidden vulnerability threatens this progress: the ...

However, launching an anti-dumping and/or anti-subsidy investigation and imposing duties on imports of solar PV products will be detrimental to the entire European solar value chain.

More than 97% of solar panels installed in the EU are imported and most come from China, she asserted. Nevertheless, the European Commission is working on a ban on ...

The antidumping and countervailing measures in major markets like the EU and the US have disrupted the growth of the global photovoltaic sector and notably affected CSPE.

Now that the dust has settled, it is time to have a closer look at the outcome of the recent trade dispute between the EU and China over alleged PV module price dumping.

This paper, which is based on new trade theory with substitutes, examines how antidumping and countervailing policies (ACPs) from the EU and the USA impact Chinese ...

Now that the dust has settled, it is time to have a closer look at the outcome of the recent trade dispute between the EU and China ...

An anti-dumping investigation can be initiated in response to a complaint lodged by European manufacturers affected by dumped imports or at the request of an EU country.

The European Union began a broad investigation Thursday into whether Chinese companies have exported solar power equipment for less than the cost of making it, in what amounts to ...

By Regulation (EU) No 1238/2013 (3) the Council imposed a definitive anti-dumping duty on imports of crystalline silicon photovoltaic modules and key components (i.e. cells) originating in ...
