We provide walk-in/non-walk-in energy storage containers, liquid cooling cabinets, marine energy storage containers and various non-standard energy storage products. Meet the requirements ...

Our storage systems feature seismic-resistant, moment-resisting reinforcements, offering the strength and flexibility to evenly distribute seismic forces and absorb energy without collapsing.

Backup generators, fuel supplies, and battery arrays should be housed in earthquake-resistant enclosures. Redundant systems must be physically separated to avoid ...

Whether the building has existed for years or construction professionals haven't yet broken ground, there are multiple ways to make ...

This white paper will discuss the history of each standard, explain the methods used to test and certify enclosures as compliant with each standard and outline how data center managers can ...

Whether the building has existed for years or construction professionals haven't yet broken ground, there are multiple ways to make data centers earthquake-resistant.

Seismic Rack Cabinets are engineered to protect critical IT and networking equipment in earthquake-prone areas. Built with reinforced construction, they offer stability, durability, and ...

B-Nest™ energy storage enables data center campuses which lack full power deliverability to enter interruptible power supply contracts with the local utility, thereby avoiding multi-year ...

Earthquake Defense offers Machine Mounts, Data Center Seismic Mounts, Base Isolators, & Multistory
