Will East Timor's first solar power plant be built in 2026?

During his nine years as a Reuters correspondent, he has attempted to lend a global perspective to small-town issues. East Timor expects the construction of its first large solar power plant to begin in 2026 and become operational months later, the state utility's chair told Reuters, helping it slash expensive diesel imports.

Will East Timor retire its diesel power plants?

East Timor plans to retire its diesel power plants in the "near-to-medium term," Ferreira said, adding that the country hopes to switch to natural gas-fired power plants and consider further renewable investments to further cut power costs.

Will East Timor transition its energy sector?

Still, East Timor's government has expressed interest in transitioning its energy sector. In 2020, it hired energy consultants to conduct a feasibility study for supplying natural gas to the three power plants. In 2021, it announced tendering for solar parks and a feasibility study for hydropower schemes.

Does East Timor have electricity?

Recovery was slow after East Timor gained formal independence in 2002. By 2015, just 60% of the population had access to electricity, according to the World Bank. Efforts to electrify the country have jumped since then, with 100% of residents having access to electricity since 2021, according to the International Renewable Energy Agency.

Major projects now deploy clusters of 20+ containers creating storage farms with 100+MWh capacity at costs below \$280/kWh. Technological advancements are dramatically improving ...

East Timor, also known as Timor-Leste, is preparing to build its first utility-scale solar power plant. Construction is officially slated to begin in 2026, with the plant located in the ...

East Timor expects the construction of its first large solar power plant to begin in 2026 and become operational months later, the state utility's chair told Reuters, helping it ...
