-----  
Where does Ecuador's electricity come from?

Ecuador's state-owned electricity company, CELEC EP, imports electricity from neighboring Colombia. CELEC is also increasing diesel purchases from Petroecuador to power its thermal electric power plants. Ecuador had a peak demand of 5,110 MW in May 2025, and according to CENACE, electricity demand grows by 360 MW every year.

What type of energy does Ecuador use?

Ecuador's renewable energy is comprised of hydro power (5,419 MW), biomass (1550 MW), wind (71 MW), photovoltaic (29 MW), and biogas (11 MW). Hydroelectric power plants are in three regions: coastal (2 provinces), Andes (9 provinces), and Amazon (4 provinces).

How much electricity does Ecuador need?

Ecuador had a peak demand of 5,110 MW in May 2025, and according to CENACE, electricity demand grows by 360 MW every year. Ecuador's energy shortage could result in a recurrence of power outages, particularly in the dry season of September through December.

Will Ecuador's energy shortage cause a recurrence of power outages?

Ecuador's energy shortage could result in a recurrence of power outages, particularly in the dry season of September through December. Ecuador has added minimal generation in recent years. In 2020, the Energy Ministry awarded two projects to the private sector: a 110MW wind farm (Villonaco), and a 200MW solar plant (El Aromo).

As a global solar battery manufacturer with installations in 138+ countries, GSL ENERGY offers adaptable storage systems specifically designed for the Ecuadorian market.

Virtual Power Plants are reshaping Ecuador's energy sector by integrating residential battery storage and solar energy. With benefits like cost savings, grid stability, and ...

Summary: Discover how SVG-based energy storage systems are transforming Ecuador's power grid stability
