We use the model to minimize total transportation costs, inventory holding, handling, folding and unfolding, container leasing, and ...

By comparing the management costs of empty container repositioning between cases where only standard containers are used, and where only the 3-in-1 foldable containers ...

We use the model to minimize total transportation costs, inventory holding, handling, folding and unfolding, container leasing, and installing facilities that accommodate ...

A rather unfamiliar, but interesting option to save costs is the possibility to fold empty containers. This could save transport costs, but also transshipment and storage costs. In ...

Abstract--This study investigates the commercial viability of foldable containers from a carrier's perspective. A cost-benefit and sensitivity analysis is conducted for operating regular and ...

This comprehensive guide will introduce you to everything about foldable plastic containers --from core features and material options to applications, customization ...

Some container carriers may use foldable containers (FLDs), such as four-in-one designs, instead of standard containers (STDs), in order to minimize the costs associated with relocating empty ...

This comprehensive guide will introduce you to everything about foldable plastic containers --from core features and material ...

The U.S. foldable and collapsible container industry is primarily driven by the need for cost efficiency and

sustainability in logistics and supply chain operations. Traditional shipping ...

A rather unfamiliar, but interesting option to save costs is the possibility to fold empty containers. This could save transport costs, but also transshipment and storage costs. In this paper, the ...

Designs of foldable containers, which affect the additional costs, including the costs of the folding and unfolding processes, manufacturing, maintenance, and repair, are key to their use [3].

We analyze the effects of foldable containers using a newly developed multi-port and multi-period container planning model. The proposed model is a large-scale optimization problem, for ...
