---

This year's exhibition saw participation from over 120 Chinese energy storage companies, which unveiled hundreds of new storage products and solutions. Among them ...

Global demand for energy storage is surging. Lithium-ion leads today, but new contenders like sodium-ion, flow, and gravity systems are shaping the future grid.

Energy storage beyond lithium ion explores solid-state, sodium-ion, and flow batteries, shaping next-gen energy storage for EVs, grids, and future power systems.

CATL is stepping up efforts in the battery energy storage systems (BESS) business with the next-generation LFP cells. Available in capacities of up to 587 Ah, the new LFP cells ...

A new long duration energy storage system that deploys molten tin for heat transfer has received \$20 million in Series A Plus funding.

CATL (SHE: 300750) has rolled out its next-generation energy storage battery cell, further expanding its bet in the sector. The battery ...

Here are ten notable innovations taking place across different energy storage segments, as highlighted in GlobalData's Emerging Energy Storage Technologies report.

As least 15 new battery energy storage systems slated for Staten Island, data shows Published: Jan. 05, 2026, 5:50 a.m.

Global demand for energy storage is surging. Lithium-ion leads today, but new contenders like sodium-ion, flow, and gravity ...

Cells exceeding 600Ah are now key to improving energy density, reducing lifecycle costs, and enhancing safety and reliability. On September 8, the Lingshou ...

China's CATL, the world's leading battery maker, has officially showcased its new 587 Ah high-capacity battery cell, which will be integrated into its next-generation TENER ...

CATL (SHE: 300750) has rolled out its next-generation energy storage battery cell, further expanding its bet in the sector. The battery giant announced at an event held in ...
