-----

Early adopters in New Cairo's industrial zone have achieved 19% reduction in energy costs and 42% fewer production disruptions. With Egypt targeting 42% renewable energy by 2035, ...

ESA brings the stakeholders of the energy storage industry together through ESA Energy Storage Conference & Expo, working to provide content to Accelerate markets, Connect its members ...

The plan aims at activating the articles of the Electricity Law No. 87 and its executive regulations issued in May 2016 regarding energy efficiency improvement requirements requested by law.

High renewable energy penetration targets cannot be achieved without more reliance on energy storage technologies. This study provides a long-term techno-economic ...

With increasing pressure on water resources and energy supplies, the need for resource-efficient and low-emission industrial ecosystems has never been more urgent.

Future projects discussed included leveraging infrastructure to support sustainable development, boost industrial productivity, and ...

This growth is primarily driven by the increasing demand for renewable energy sources, government initiatives to enhance energy efficiency, and the need for reliable energy storage ...

Recent data shows Egypt's energy storage capacity grew 40% YoY since 2023 [1], outpacing regional competitors. But here's the kicker: 60% of these projects use locally ...

Emphasizing Egypt's vast solar and wind resources, this study proposes the large-scale adoption of renewable
