A flywheel serves four main purposes (in most vehicles): It provides mass for rotational inertia to keep the engine in motion It is specifically weighted to provide balance for ...

The flywheel is the thickest at these points and can take a hit from a punch if common sense is applied. I have done it so I know it works. If it didn't have a puller to get at ...

The solenoid pushes a little gadget that engages with the flywheel / flex plate, so that when the starter spins, it turns the motor. If you just hear a whirring sound like the starter ...

Saw a video last night of someone "referencing " another video about someone removing a flywheel the toolless way, hammering it off with a hammer and punch. Said it ...

I understand how a clutch can separate the flywheel from the clutch disk so that power is disconnected from the engine. When that happens, does the input shaft (along with ...

This previous question explains what a flywheel does and why it is needed. That explanation means that the flywheel needs a certain amount of mass to do its job. However, ...

Most saws run 0.010 - 0.012, that is 10 to 12 thousand clearance between the coil and flywheel magnets, a business card is very close in thickness and that is what many use for ...

I have a stihl 064 I think the coil is going out. I pulled the flywheel today and its a 1122 400 1204 the coil is the prufrex 1122 400 1303. I know this was talked about a few ...

14 Recently in chat, a discussion arose about a dual mass flywheel. I am blissfully ignorant regarding how a dual mass flywheel actually functions and what the delta is between ...

Flywheel energy storage flywheel
