Why is a solar power plant important in the Gambia?

H.E. Corrado Pampaloni, Ambassador of the European Union to The Gambia, stated that this solar power plant is particularly important for the Gambia as it is part of the 'Gambia Electricity Restoration and Modernization Project' and contributes to a swift transition towards solar power and clean energy supply across the country.

Will a new solar plant increase energy demand in the Gambia?

Energy demand in The Gambia has increased by 5.5% per year in recent years. The new 23 MWp solar plant will significantly increase Gambia's current generation capacity of 98 MW and enable electrification of rural areas. A strong commitment

What is the current energy generation capacity of the Gambia?

The Gambia's current generation capacity is 98 MW. Energy demand in The Gambia has increased by 5.5% per year in recent years and today's connection of the new 23 MWp solar plant to the national energy grid will significantly increase this capacity.

Will the Gambia achieve universal access to electricity by 2025?

The Gambia aims to achieve Universal Access to electricity by 2025, as stipulated by H.E President Adama Barrow. NAWEC will implement this goal primarily through its grid infrastructure, benefiting from the country's favourable geography.

The Gambia has officially opened a 23 MW solar power facility with 8 MWh of battery storage. This project is part of the Gambia ...

On Saturday, at a historic occasion in the Community of Kombo Jambur, President Barrow led the official inauguration ceremony of the now completed 23 Megawatt Solar Plant ...

Gambian utility NAWEC and the country's Ministry of Petroleum and Energy is seeking proposals for a first phase 50 MW solar project with energy storage located in Soma.

It is designed not only to enhance energy generation capacity but also to introduce robust battery storage to stabilize and optimize ...

It is designed not only to enhance energy generation capacity but also to introduce robust battery storage to stabilize and optimize electricity distribution across the country.

Ever wondered how a coastal city like Banjul keeps the lights on during stormy seasons or tourist influxes? Enter the Banjul Power Plant Energy Storage initiative--a game ...

On Saturday, at a historic occasion in the Community of Kombo Jambur, President Barrow led the official inauguration ceremony ...

Built by Chinese manufacturer Tebian Electric Apparatus, the 23 MW solar plant - equipped with an 8 MW electricity storage system - serves to reduce the country's reliance on ...

AIC Green Energy, a Gambian-Turkish renewable energy firm, has been formally recognised at the 10th Edition of the ECOWAS ...

This project component consists in the construction of a new 23 MWp solar park tied with 8MWh battery storage and aims to revolutionize power generation in the Gambia by ...

Gambia's Ministry of Petroleum and Energy and utility National Water and Electricity Company (Nawec) have invited independent power producer (IPP) developers to ...

AIC Green Energy, a Gambian-Turkish renewable energy firm, has been formally recognised at the 10th Edition of the ECOWAS Sustainable Energy Forum (ESEF 2025) for its ...
