-----

Georgia Power is seeking 500 MW of energy storage with the ability to discharge for at least two hours, either standalone or with associated renewable resources, the utility ...

The findings are clear: portfolios with more renewables (including solar, wind, and battery storage resources) deliver superior results on cost, reliability, and emissions -- without ...

With the Southeast projected to see sustained investment in solar and wind, Georgia Power's early-mover advantage in storage and grid modernization could translate into ...

The new storage capacity will be pivotal in integrating more solar and wind power into the grid, enhancing the stability and reliability of the state's renewable energy infrastructure.

Find answers to frequently asked questions about the Saunders Crossing Energy Storage project - advancing clean energy and grid reliability in Georgia.

Program participants will be able to purchase up to 3,000 MW of customer-identified resources through 2035, as part of Georgia Power's plan to procure up to 4,000 MW ...

It stores and releases energy, reduces wind and solar curtailment, manages peak demand, and enhances power supply reliability. CRRC has introduced the 5.X liquid-cooling energy storage ...

The Company is equipped to offer customized wind-solar-hydrogen-storage integration solutions for various scenarios, accelerating the global shift towards carbon ...

At the event, CRRC unveils its integrated wind-solar-hydrogen-storage solution, seamlessly incorporating multiple energy sources, including wind, solar, hydropower, and ...

If you've ever wondered how renewable energy systems maintain grid stability while juggling solar panels, wind turbines, and battery banks, meet the unsung hero: the ...
