With the advent of the AI digital era, we focus on the application of smart technology to provide breakthrough solutions for the aquaculture ...

Fast-charging technology is intended to utilize the mandatory driving breaks to enable the unrestricted use of battery-electric vehicles in long-distance transport.

Demand feeders provide some similar benefits but with feeding tailored to fish appetites and, in some cases, feed dispersal without electricity. This review explores the ...

Aquaculture in Germany stretches from semi-natural, extensively managed earthen pond to flow-through facilities, net cages, and closed recirc-systems. In the marine environment, mussel ...

More than 30,000 tonnes of fish and seafood are produced in aquaculture in Germany every year. That sounds a lot at first, but it only meets a small part of German demand.

With the advent of the AI digital era, we focus on the application of smart technology to provide breakthrough solutions for the aquaculture and electric vehicle charging markets.

Yes, a portable magnetic electric air pump with fast-charging capability can significantly stabilize dissolved oxygen levels in remote aquaculture systems when grid power fails--especially for ...

Explore the advantages and disadvantages of foldable container designs, including portability, cost savings, and potential drawbacks for shipping and storage solutions.

German startup Seawater Cubes, co-founded by former engineers from Meeresfischzucht V&#246;lkingen,
