---

We are developing 10 solar and wind projects, each 10 MW in size at 10 different university campuses across the country. Roughly 86% of Burundians live in rural areas and a mere 1% ...

Work has stepped up at the 1.3-gigawatt Mammoth Solar complex in Indiana. Doral Renewables has issued Full Notice to Proceed to engineering and construction partner ...

Discover the world's biggest operational solar farms and the mega projects set to reshape tomorrow's renewable energy landscape.

Explore the latest milestones in U.S. utility-scale solar projects, from Texas to Colorado, showcasing mega farms driving ...

Imagine repurposing an old coal power plant into a Gigawatt-hour ESS (Energy Storage System), powered by solar or wind energy. This innovative technology offers a sustainable second life ...

The California Energy Commission (CEC) is reviewing a pair of enormous solar + storage projects proposed by Intersect Power ...

There are now more than five million solar installations in the U.S., according to the Solar Energy Industries Association. Below are the top five largest solar installations in the ...

Explore the latest milestones in U.S. utility-scale solar projects, from Texas to Colorado, showcasing mega farms driving renewable energy growth.

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development. The list is ...

In 2024, generators added a record 30 GW of utility-scale solar to the U.S. grid, accounting for 61% of capacity additions last year. We expect this trend will continue in 2025, with 32.5 GW ...

We are developing 10 solar and wind projects, each 10 MW in size at 10 different university campuses across the country. Roughly 86% of ...

The California Energy Commission (CEC) is reviewing a pair of enormous solar + storage projects proposed by Intersect Power subsidiaries that, if constructed, would each ...
