Africa's energy storage market has seen a boom since 2017, having risen from just 31MWh to 1,600MWh in 2024, according to trade body AFSIA Solar's latest report.

Solar MD officially opened Africa's first gigawatt factory in Cape Town to support the company's commitment to developing and manufacturing high-performance energy ...

Three companies have partnered to develop the Northern Power IPP solar and battery project in the power hungry Copperbelt, as Zambia continues efforts to reduce its ...

The Noor I CSP plant features a full-load molten salt storage capacity of three hours, while the Noor II and III CSP plants are able to ...

Off-grid energy solutions, powered by battery storage technology, present the most viable path to universal access. The adoption of renewable energy storage systems is a ...

In 2024, an estimated 1,500 MWh was installed across African nations. Accounting for more than half of this figure alone was the Kenhardt 1-2-3 project by Norwegian ...

The Noor I CSP plant features a full-load molten salt storage capacity of three hours, while the Noor II and III CSP plants are able to store energy for up to seven hours each, thus ...

Operational since Q2 2023, this \$420 million hybrid facility combines 180MW solar PV with 76MW/305MWh battery storage - making it Sub-Saharan Africa's largest integrated renewable ...

UAE-based Global South Utilities has begun construction on a 50 MW solar project with 10 MWh of battery
