The Department of Energy (DOE) Loan Programs Office (LPO) is working to support deployment of energy storage solutions in the United States to facilitate the transition to a clean energy ...

Funded by President Biden's Bipartisan Infrastructure Law, these demonstration projects will increase community control of local power systems, mitigate risks associated with ...

In this article, we explore how utilities and developers are approaching the planning, deployment, and integration of grid-level storage systems--and what makes these ...

The industry is in the process of building 25 new or expanded manufacturing facilities to support the grid-scale energy storage market; of these, 11 are now in operation or under construction.

Paul Walker of Progress Rail shares how Caterpillar's hybrid systems are stabilizing the grid through integrated microgrids, storage, and controls. Andrew Tanner of ...

Developers expect to bring more than 300 utility-scale battery storage projects on line in the United States by 2025, and around 50% of the planned capacity installations will be ...

Developers expect to bring more than 300 utility-scale battery storage projects on line in the United States by 2025, and around 50% of ...

With growing emphasis on clean energy transition, the Canadian government is actively promoting energy storage projects to enhance grid stability and optimize energy utilization ...

The energy storage industry is making significant progress in laying the groundwork for a domestic battery
