---

Professor Dooyoung Hah, a researcher at Abdullah Gul University (Türkiye), has unveiled a new type of organic solar cell with a unique hemispherical shape, giving us a ...

In a pioneering move, new research from Abdullah Gul University (Türkiye) reimagines the structure of organic photovoltaic cells, opting for a hemispherical shell shape to unlock ...

In a pioneering move, new research from Abdullah Gul University (Türkiye) reimagines the structure of organic photovoltaic cells, opting for a hemispherical shell shape to ...

The shape of a solar cell can greatly affect its light absorption efficiency. Abdullah Gul University assistant professor Dooyoung Hah ...

The transition to sustainable energy sources is imperative for addressing global challenges related to climate change and energy security. Hemispherical-shell-shaped organic ...

In a groundbreaking study from Abdullah Gul University in Türkiye, researchers have developed a novel hemispherical shell structure for organic photovoltaic cells, ...

New research proposes to redefine organic solar cells with a hemispherical shell design that offers expanded angular coverage, particularly advantageous for applications ...

Researchers at Abdullah Gul University in Türkiye have developed hemispherical solar cells that will boost both light capture and angular coverage. The novelty of this design ...

New research suggests redesigning organic solar cells with a hemispherical shell structure to provide broader angular coverage, which ...

Hemispherical-shell-shaped organic photovoltaic cells have emerged as a promising solution, offering significant absorption improvements compared to traditional flat ...

The shape of a solar cell can greatly affect its light absorption efficiency. Abdullah G&#252;l University assistant professor Dooyoung Hah recently investigated the potential of ...

The transition to sustainable energy sources is imperative for addressing global challenges related to climate change and energy ...
