At Sunchees, we understand the unique energy challenges hospitals face: high energy demands from ICUs, operating theaters, diagnostic labs, and medical cold chains; and the critical need ...

Moreover, the project has introduced the PVmedPort, a stand-alone solar-powered unit designed for mobile outreach vaccination ...

Moreover, the project has introduced the PVmedPort, a stand-alone solar-powered unit designed for mobile outreach vaccination and education campaigns beyond ...

This system uses an 860kWh battery, a 200kW power conversion system and a 300kW PV system to provide efficient, clean and sustainable power support for the hospital.

Managed by the African Development Bank (AfDB), in partnership with the European Union and the Togolese government, the project provides off-grid solar solutions, ...

This system uses an 860kWh battery, a 200kW power conversion system and a 300kW PV system to provide efficient, clean ...

Located in a remote area of Liberia, the hospital does not have access to city electricity and relies only on existing solar systems ...

SophiA will develop and locally manufacture innovative, modular, flexible, affordable and efficient solar powered containers which provide: Safe, clean drinking water and distilled water for ...
