What incentives are available for solar panels?

First, there are solar incentives offered by federal, state, and local governments, in addition to utility providers. The most notable is the federal solar tax credit worth 30% of what you pay for solar panels.

How much does a solar system save on energy costs?

On average, homeowners with a complete solar system save \$41,000 to \$62,000 on total avoided energy costs over 25 years. It all depends on what your local utility charges for electricity, according to Robert Flores, a solar expert at The University of California, Irvine's Clean Energy Institute.

How do I calculate the cost of my solar system?

If you'd rather make your calculations offline, there are a few simple steps to estimate the cost of your solar system based on your electricity usage. To get started: Dig up some recent electricity bills (the more the better!) Divide your monthly consumption by 30 to get your daily electricity consumption.

If you enter your details into the solar calculator below, you will get a solar cost and savings estimate and find out how much solar panels will cost for your home based on current offers ...

As of May, 2025, the typical cost to have solar panels installed in New York is \$3.73/W. Based on the cost, you are able to conclude that for every 1000 watts (1 kW) your solar system can ...
