Does Photovoltaic Glass fit in a curtain wall?

No, the BIPV photovoltaic glass structurally does not differ from other types of conventional glazing. Therefore, it is integrated into the building envelope (curtain wall, facade, or skylight) like any construction material. What solar control and comfort advantages does photovoltaic glass offer in a curtain wall?

Are glass curtain walls energy efficient?

Glass curtain walls are energy efficient as they help natural light enter buildings. They use specially glazed glass, providing an esthetically pleasing exterior or interior for your office building. The use of natural light reduces the need for artificial lighting, making glass curtain walls an energy-saving solution for commercial buildings. Curtain walls have been used in commercial buildings for a long time, especially in New York City.

What is a photovoltaic curtain wall?

They enhance thermal comfort and help prevent the greenhouse effect. A standard curtain wall offers no return on investment. In contrast, a photovoltaic curtain wall not only insulates the building but also generates power for over 30 years. This reduces monthly electricity bills and ultimately pays for itself over time.

At Fiduciary Glass Inc., we design and install special glass walls for buildings, making them stronger, energy-efficient, and modern. As experts in curtain walls, we take care of everything ...
