beyond should know about the Clean Export Guarantee.

Everything you need to know about the new feed-in tariff for solar electricity produced in Ireland. Timelines, rates, how it works and more

Since July 2022, Irish homeowners have been eligible to sell their surplus solar electricity to the grid. Prices for exported electricity are negotiated between electricity suppliers ...

Smart Meters: Measure in Both Directions  
Standard (Pre-Smart) Meter: Estimated Values  
Old Wheel Meters: Run Backwards  
If you have one of those old meters with a spinning wheel, then yes, it does run backward when you're exporting electricity! They measure your net usage. ESB Networks and utility companies are eager to replace the remaining old meters, but as of now, some are still in use across the country, including in homes with solar installations.
