Do I need a power adapter in Portugal?

The standard voltage in Portugal is 230V, and the frequency is 50Hz. Devices from countries with different voltage standards, like the United States (120V), may require a voltage converter in addition to a plug adapter. Do You Need a Power Adapter in Portugal? Whether you'll need a power adapter depends on the type of plug your devices use.

What type of power socket does Portugal use?

The answer is simple. Portugal uses Type F power sockets, which have two round pins and grounding clips. Your standard US devices with flat, two-pronged plugs won't fit directly into these outlets. To use your electronics, you'll need a Portugal adapter type that specifically converts US plugs to Type F.

Do I need a plug adapter to use my UK devices in Portugal?

You will need a plug adapter to use your UK devices in Portugal that converts your UK Type G plug (three rectangular pins) to a Type F socket. You can easily find these plug adapters at most travel or electronics stores or online retailers. Ensure that the adapter is compatible with the specific Type F sockets in Portugal.

What plugs do you need in Portugal?

They are usually dual voltage (110V/220V), so all you need is the correct plug adapter. Portugal uses two common plug types: For your small devices, a simple Type-C adapter will do the trick. These adapters are compact, affordable, and widely available, so you can pick one up before you travel or at the airport.

As long as your US-to-Portugal power adapter has two round pins and can fit into the rounded sockets in the wall, it will work. However, it's safer to use a grounded adapter, ...
