-----

The two companies announced yesterday (4 November) that their jointly operated business is constructing a 30MW/125MWh battery ...

By promoting the integration of PV systems with energy storage solutions, it addresses the challenges of supply-demand balance and grid stability. Tensor Energy is ...

Under the agreement, OTS will supply Japan Semiconductor with environmental value derived from renewable energy generated by the Kunishitaike Solar Power Plant in ...

Virtual power plants are emerging as a key growth driver for Japan's energy storage sector. By connecting residential batteries across ...

As we approach Q4 2025, all eyes are on Japan's storage rollout. Will this ambitious policy deliver energy independence, or become another case of infrastructure overreach?

The large-scale energy storage facility "EV Battery Station Chitose" in Hokkaido, began operations in 2023. This facility aims to stabilize the electric grid in Hokkaido and is ...

Sonnedix Japan broke ground on its first battery system in October 2025, planning to retrofit a 30MWAC/38.6MWDC solar power plant it owns in Oita City, Oita Prefecture, with ...

Starting in fiscal 2026, the trade of this type of electricity stored in residential storage batteries will be facilitated in a dedicated ...
