-----

Aiviekste HPP was the first hydropower plant in Latvia; it started generating electricity back in 1925. The reconstruction of the hydropower plant was ...

The Nordic Investment Bank (NIB) has granted a EUR230 million loan to Latvenergo AS, Latvia's state-owned power utility, to support the ...

Latvenergo, Latvia's leading energy company, plans to install 250 megawatts (MW) of energy storage capacity by 2030. This ambitious ...

The aim of the study was to evaluate the potential of wind energy storage in the existing hydropower plant reservoirs in Latvia with the pumped hydroelectric energy storage (PHES) ...

Latvenergo said it will build the battery energy storage system (BESS) projects in response to increasing demand for flexibility and to ...

The first BESS projects are being implemented in Latvia and at Latvenergo production sites - starting with the smaller-scale BESS at Latvenergo AS CHPP-1 and ...

As can be seen, Latvia is currently focusing mainly on BESS, but research on the potential of power to x or power to H2 in Latvia is also ...

Latvenergo said it will build the battery energy storage system (BESS) projects in response to increasing demand for flexibility and to synergise with its hydropower, gas-fired ...

As can be seen, Latvia is currently focusing mainly on BESS, but research on the potential of power to x or

power to H2 in Latvia is also being actively developed. Given Latvia's ...

Latvenergo, Latvia's leading energy company, plans to install 250 megawatts (MW) of energy storage capacity by 2030. This ambitious target is part of a broader strategy to ...

Aiviekste HPP was the first hydropower plant in Latvia; it started generating electricity back in 1925. The reconstruction of the hydropower plant was completed in 2022, and the plant's ...

The Nordic Investment Bank (NIB) has granted a EUR230 million loan to Latvenergo AS, Latvia's state-owned power utility, to support the company's investment in renewable ...
