---

The new hybrid energy system - combining 7.5 MW of solar power with 6 MWh of battery storage - enables the brewery to fully ...

We have deployed Solar Power Container units at three of our mines and the results have been outstanding. The ease of transportation and short installation time saved us weeks of downtime.

Designed for Plug and play operations, the ZSC range of mobile solar power is easy to setup and commission. The compact container is easy to transport and is a low maintenance asset on site.

Lithuania added record solar capacity in 2024, pushing cumulative installations to nearly 2 GW, driven largely by residential ...

Danish clean energy developer European Energy will use part of a EUR145 million loan package secured from two Swedish lenders to construct a battery energy storage system ...

Lithuania added record solar capacity in 2024, pushing cumulative installations to nearly 2 GW, driven largely by residential systems and a favorable regulatory framework.

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

Lithuanian renewables developer Green Genius has picked up financing for an energy-as-a-service (EaaS) project that will involve installation of 6.5 MW of solar power and 6 MWh of ...

The Energy Cells storage facility system to be integrated into the Lithuanian grid will have a total combined capacity of 200 megawatts(MW) and 200 megawatt-hours (MWh).

Danish clean energy developer European Energy will use part of a EUR145 million loan package secured from two Swedish lenders to ...

We have deployed Solar Power Container units at three of our mines and the results have been outstanding. The ease of transportation and short ...

The Lithuania Kaunas EK Energy Storage Project demonstrates how mid-scale installations (20-100 MW) can achieve outsized impacts. By balancing technical innovation with practical ...
