Will the London Underground be powered by solar energy?

Transport for London (TfL) has signed a major new deal to power the London Underground using clean solar energy, as part of a long-term plan to decarbonise the capital's transport network and support biodiversity. A new solar facility will be built in Longfield, Essex, by EDF Renewables UK through its subsidiary Longfield Solar Energy Farm Limited.

What will a new solar facility do for the tube?

The contract will see a new solar facility built in Longfield, Essex, and renewable energy generated for the Tube. The facility will also support the decarbonisation of the National Grid and increase its renewable energy capacity.

Who funded Europe's largest floating solar panel array?

Europe's largest floating solar panel array was funded and completed in March 2016 by Lightsource bp on London's Queen Elizabeth II reservoir. We are always on hand to assist with any enquiries. You can contact us via email or phone our customer services team.

Who owns the energy storage project?

The project is owned by Quinbrook Infrastructure Partners and developed by Wirsol Energy; Hive Energy. For more details on the latest energy storage projects, buy the project profiles here. The gold standard of business intelligence.

The DP World London Gateway - Battery Energy Storage System is a 320,000kW lithium-ion battery energy storage project located in Thurrock, Essex, England, the UK.

Discover how TfL's groundbreaking solar energy deal with EDF Renewables will power the London Underground, cut carbon ...

Discover how TfL's groundbreaking solar energy deal with EDF Renewables will power the London Underground, cut carbon emissions by 28,000 tonnes, and boost UK ...

Long Duration Electricity Storage (LDES) facilities provide vital back-up for the renewable power system - working like giant batteries that store electricity created by wind ...

Transport for London (TfL) has signed a major new deal to power the London Underground using clean solar energy, as part of a long-term plan to decarbonise the capital's ...

Discover how a groundbreaking solar facility is revolutionizing the London Underground by providing clean energy for its trains. Explore the impact of renewable energy ...

The London Energy Storage Plan, set for official unveiling on November 15, 2025, promises to tackle energy volatility like a proverbial umbrella in a British rainstorm.

EDF Renewables UK has signed a 15-year power purchase agreement (PPA) with Transport for London (TfL) to power London's Tube. The PPA will help fund the construction of ...

The 150 MW Andasol solar power station is a commercial parabolic trough solar thermal power plant, located in Spain. The Andasol plant uses tanks of molten salt to store captured solar ...

In March 2016, Lightsource Renewable Energy successfully completed and connected Europe's largest floating solar farm, installing 6.3MW on the Queen Elizabeth II Reservoir, near London. ...

Transport for London has signed a deal with EDF Renewables to purchase electricity from a massive solar array to be erected next year in Essex. The array will generate 80 ...
