What are energy storage procurement contracts?

Energy storage procurement contracts must also take into account the ever-evolving suite of laws and regulations applicable to energy storage projects, including as a result of the recent change in administration in the United States.

Are high soft costs a barrier to energy storage deployment?

In 2018, the New York Public Service Commission (NY PSC) identified high soft costs as a major barrier for energy storage deployment in their state. The CPUC Energy Storage Procurement Study aims to address similar challenges in California.

What does the PU's Energy Storage Procurement Framework do?

The PU's Energy Storage Procurement Framework provides crucial motivation to the development of both demand and supply in this marketplace. Since the time of Assembly Bill 2514 and through 2021 California built a rich ecosystem for energy storage research and development, commercialization, and project deployment.

What is California's energy storage procurement framework?

California's energy storage ecosystem, built since Assembly Bill 2514 and through 2021, includes a crucial component: the PU's Energy Storage Procurement Framework. This framework motivates the development of both demand and supply in the energy storage marketplace.

Latest Energy Storage RFPs, bids and solicitations. Bid on readily available Energy Storage contracts with the best and most comprehensive government procurement platform, ...

The stakeholder questions below are intended to guide the RFP Drafting Parties in navigating these often-competing considerations. Both types of energy storage systems play a ...

While the energy storage market continues to rapidly expand, fueled by record-low battery costs and robust policy support, challenges still loom on the horizon--tariffs, shifting ...
