Growth in wind and solar capacity can make the Middle East and North Africa (MENA) region a clean energy and green hydrogen hub. But MENA currently lags behind its ...

Large solar projects, such as Phase 5 of Rashid bin Mohamed Al-Makhtoum Solar Park, are making successful headway, but challenging conditions persist for onshore wind ...

The work leverages the insights from the Renewable Projects database, the MENA H2 tracker and the newly added Energy Storage Projects database on one side, and the unique ...

From solar and wind to nuclear and green hydrogen, countries across the region are investing heavily in renewable energy. Here's a closer look at some of the most ambitious and ...

Explore 10 renewable energy projects in the Middle East, showcasing solar, wind, and battery storage advancements set for 2025. Read more here.

Heralded as the largest project of its kind, the plan would seek to commission the kingdom's first two solar farms by 2019, featuring 3GW and 4.2GW of solar capacity, and eventually integrate ...

A collaboration of NEOM, ACWA Power and Air Products, it combines onshore solar, wind and energy storage, targeting 600 tons of daily green hydrogen output by 2026.

The project will feed energy to Gotion Power's new electric vehicle (EV) battery gigafactory in the northwestern Moroccan city of Kenitra. The renewables-plus-storage plant ...

Round 3 projects consisting of 150 MW of solar and 50 MW of wind power, including a storage option, are
