BYD opened a sodium-ion battery factory in 2024, and is producing a large sodium-ion battery energy storage system (BESS) called MC Cube-T with a capacity of 6.4 MWh.

American battery startup Peak Energy and energy developer Jupiter Power have teamed up to deploy grid-scale sodium-ion batteries. It's a big step forward for the nascent--and in some ...

They include an expansion in applications to include energy storage, plus use in battery swap systems, passenger vehicles, and commercial vehicles. CATL said this ...

Peak Energy's solution is the first battery energy storage system to remove nearly all moving parts with new patent-pending technology, driving significant cost-savings.

American battery startup Peak Energy and energy developer Jupiter Power have teamed up to deploy grid-scale sodium-ion batteries. It's a big step forward for the ...

CATL's sodium-ion battery advances to aqueous production lines and steadier voltage, giving drivers and homeowners more affordable, reliable power storage.

This technology strategy assessment on sodium batteries, released as part of the Long-Duration Storage Shot, contains the findings from the Storage Innovations (SI) 2030 strategic initiative.

Two battery companies are joining forces with a plan to deploy energy storage systems in the US that rely on sodium-ion ...

CATL says its sodium ion batteries will see wide application across vehicles and energy storage in 2026.

Mobile energy storage sodium battery

Two battery companies are joining forces with a plan to deploy energy storage systems in the US that rely on sodium-ion technology.

Peak Energy debuts the US's first grid-scale sodium-ion battery, cutting costs and boosting reliability with passive cooling tech.

The drastic drop in the price of battery-grade lithium carbonate after its 2022 peak made sodium-ion battery production harder to justify. Now that the trend is reversed, CATL ...
